Abstract

Enterprise computing is undergoing another revolution as Internet and Web-based technologies dramatically change and simplify the computing architectures within and between companies. The question remains however, of where and how this new computing model will truly benefit the enterprise. Our Team believes that this revolution, while impacting many types of software application development, will be most powerful in inter-business electronic commerce.

We started this project with the intent of developing a CRM based online architecture. The team successfully developed such architecture and mapped it into the banking domain to provide a proof of concept domain. The project architecture can successfully be extended to other online domains like online medical transcription system, E-transactions, E-hiring and E-shop etc.

The project team gained significant learning and experience from the project involving domains like Com Technology, Active Server Pages (ASP), Java Script, and Database Concepts etc. The main achievement include, developing the team expertise in multi-tier distributed architectures. The team also observed Software Engineering practices during the research and development phase to strengthen their skills.

Table of Contents

Chapter 1: Introduction	
1.1 Purpose of Document	2
1.2 Project Team (ComIT)	2
1.2 Project Objectives	2
1.3 Project Benefits	2
Chapter 2: Literature Survey	
2.1 Introduction to Multi-Tier Computing	4
2.2 Two-Tiered Architectures and Their Strengths	5
2.2.1 Two-Tiered Application Limitations	6
2.3 From Two-Tier to Multitier Systems	7
2.3.1 Splitting Out the Presentation Tier	10
2.3.2 Logical Tiers vs. Physical Deployment	11
2.4 COM Technology	12
2.4.1 Introduction	12
2.4.2 COM and the Client Server Model	13
2.4.3 COM and Application Structure	14
2.5 From COM to MTS	15
2.6 Understanding COM+ Services	16
2.6.1 Internet Information Services	16
2.6.2 Internet Information Services Architecture	17
2.6.3 IIS Core Functionality	18
2.7 Three-Tiered Architectures	19
2.7.1 Three-Tiered Strengths	19
2.8 Data Modeling	20
2.8.1 Choosing a Data Storage Technology	21
2.8.2 Data Access Technologies	21
2.8.3 Data Access Using ActiveX Data Objects (ADO)	24
2.8.4 Understanding the ADO Object Model	25
2.8.5 Accessing Data with ADO	26
Chapter 3: Proposed System	
3.1 Proposed System	29
3.1.1 Requirements of the Proposed System	29
3.2 Objectives of the Proposed System	30
3.3 Advantages of the Proposed System	31
Chapter 4: Implementation	
4.1 System Deliverables	33
4.2 The Presentation Layer	34
4.2.1 Login/Logout	34
4.2.2 Payments	35
4.2.2.1 Find Payments	36
4.2.2.2 Payment Details	37
4.2.3 Banks	38
4.2.3.1 Bank Details	39
4.2.4 Bank Accounts	40

4.2.4.1	<i>Blocking Bank Account</i>	40
4.2.4.2	<i>Unblocking Bank Account</i>	40
4.2.5	<i>Bank Account Details</i>	41
4.2.6	<i>Security Scheme</i>	42
4.2.6.1	<i>Groups</i>	42
4.2.6.2	<i>Target Groups</i>	44
4.2.6.3	<i>Users</i>	47
4.2.6.4	<i>User Details</i>	48
4.2.7	<i>Find Customer</i>	49
4.2.8	<i>Change Password</i>	50
4.3	<i>Middle-Tier Components</i>	51
4.3.1	<i>iSmartBank</i>	51
4.3.1.1	<i>clsBankDB</i>	51
4.3.1.2	<i>clsBankInfo</i>	52
4.3.2	<i>iSmartCustomerAccount</i>	52
4.3.2.1	<i>clsCustAcctDB</i>	52
4.3.2.2	<i>clsCustAcctDbImpl</i>	54
4.3.2.3	<i>clsCustAcctInfo</i>	55
4.3.3	<i>iSmartDMSCClient</i>	55
4.3.3.1	<i>clsDMSDB</i>	55
4.3.3.2	<i>clsDMSInfo</i>	56
4.3.3.3	<i>clsDMSNotesInfo</i>	56
4.3.4	<i>iSmartError</i>	56
4.3.4.1	<i>clsSmartErrorDB</i>	56
4.3.5	<i>iSmartFee</i>	57
4.3.5.1	<i>clsFeeDB</i>	57
4.3.5.2	<i>clsFeeInfo</i>	57
4.3.6	<i>iSmartPayment</i>	57
4.3.6.1	<i>clsPaymentDB</i>	58
4.3.6.2	<i>clsPaymentDbImpl</i>	59
4.3.6.3	<i>clsPaymentInfo</i>	60
4.3.6.4	<i>clsPmtStatusInfo</i>	61
4.3.7	<i>iSmartPaymentSrc</i>	61
4.3.7.1	<i>clsBankInfo</i>	61
4.3.7.2	<i>clsPaymentSourceDB</i>	61
4.3.7.3	<i>clsPaymentSourceInfo</i>	66
4.3.7.4	<i>clsPmntPartialInfo</i>	66
4.3.7.5	<i>clsSearchPmntSrcInfo</i>	66
4.3.8	<i>iSmartSecurity</i>	66
4.3.8.1	<i>clsAction</i>	67
4.3.8.2	<i>clsActionDBImpl</i>	67
4.3.8.3	<i>clsGroup</i>	67
4.3.8.4	<i>clsGroupAction</i>	68
4.3.8.5	<i>clsGroupActionDBImpl</i>	69
4.3.8.6	<i>clsGroupDBImpl</i>	70
4.3.8.7	<i>clsPermission</i>	71

4.3.8.8 <i>clsSecurityDB</i>	71
4.3.8.9 <i>clsTargetGroups</i>	71
4.3.8.10 <i>clsTargetGroupsDBImpl</i>	72
4.3.8.11 <i>clsUser</i>	73
4.3.8.12 <i>clsUserDBImpl</i>	74
4.4 The Database Layer	76
4.4.1 Stored Procedures	76
4.4.2 Packages.....	76
4.4.3 Tables	78
Chapter 5: Testing	
5.1 Introduction	80
5.2 Testing Objectives	81
5.2.1 <i>Attributes of a "good" Test</i>	81
5.3 Testing Strategies	81
5.3.1 <i>Code Testing Strategy</i>	82
5.3.2 <i>Specification Testing Strategy</i>	82
5.4 Levels of Tests Performed	82
5.4.1 <i>Unit Testing</i>	82
5.4.2 <i>Integration Testing</i>	82
5.4.3 <i>System Testing</i>	83
Chapter 6: Conclusion	85
Chapter 7: Future Development	87
Appendix A: Technical Manual	88
Bibliography	94
