ABSTRACT

This dissertation presents an VISUAL BASIC based project exploring the two technologies of database Microsoft such as **Visual Basic** and **Ms-Access**. This project is designed for small scale use. It features every aspect of a small Sales and Purchase Inventory System. Visual basic version 6.0 has been used as the key for the front end development. No doubt Ms-Access tools are enough to design every kind of database, small to medium and medium to large scale. The Inventory system will cover the following concepts:

- Sales Section
- Purchase Section
- Order and Receive Section
- Security Section
- Items Section

Abstract		vi
List of figures		x
Chapter 1	Introduction	1
1.1	Security Section	3
1.2	Table Information Section	3
1.3	Service crew Information System	4
1.4	Ingredient Information System	5
1.5	Menu Information Section	6
1.6	Supplier Information Section	7
1.7	Sales Order Information Section	8
1.8	Purchase Order Information Section	8
1.9	Receiving Order Information Section	9
1.10	The Developers at Work	11
Chapter 2	Requirement Analysis	12
Chapter 3	Existing system	14
Chapter 4	Proposed System	16

	Why Visual Basic?	19
5	Microsoft Access	20
5.1	Basic Functionalities	20
5.1.1	Web Access	20
5.1.2	Collaboration	21
5.1.3	Rapid development	21
5.2	Create sophisticated database solutions	22
5.2.1	SQL Server integration	22
5.2.2	Enterprise Integration	23
5.2.3	Workflow Integration	23
5.2.4	Mobile computing	24
5.2.5	Improved analysis and presentation capabilities	24
5.2.6	Improved analysis and presentation capabilities	25
5.3	Build database solutions faster	25
5.3.1	Leverage existing skills	25
5.3.2	Design and build Data Access Pages	26
5.3.3	Leverage enterprise and Web-based schema	26
5.4	Updated Object Model	27
5.4.1	Extended methods and properties	27
5.4.2	New events for forms	28
5.4.3	New properties for forms and reports	28
5.4.4	Data Access Page Events	28
5.5	Distribute and Deploy Access solutions	29
5.5.1	Deploying Web-based solutions	29
5.5.2	Distributing Access solutions	29
5.5.3	Easily upsize or upgrade to SQL Server	29
5.5.4	Backward compatibility	29

5.6	Enhanced Features of VB 6.0	30
5.6.1	The Validate Event and the CausesValidation Property	30
5.6.2	Adding Excitement with the New Graphical Enhancements	31
5.6.3	Working with the New Controls	31
5.6.4	New Object Programming Additions	31
5.7	Integration of Microsoft Access and Microsoft Visual Basic	32
5.7.1	Determine the number of records in a table and the table's creation and last-modified dates	32
5.7.2	Attach a table from another database file	32
5.7.3	Import a text file	32
5.7.4	Save graphics in a database file	32
5.7.5	Make sure that an operation involving multiple tables is not left partially completed	32
5.7.6	Compact a database or repair a corrupted database	33
5.7.7	Use Parameter Queries Stored in Microsoft Access Databases	33
5.8	Combining Visual Basic and the Web	33

Chapter 6

	Project Planning and Management	34
6.1	<i>Communicating the Customer</i>	36
6.2	Development Environment	37
6.2.1	Technology to be Built	38
6.2.2	Staff Size and Experience	38
6.3	Preparing a feasibility plan	38
