Abstract

Purpose- Major aim of this study was to evaluate the impact of HSE on productivity profitability and just in time shipments

Methodology/sample- The study involved use of social compliance audit reports and financial data of three textile factories for the period of 2012-2014 for financial analysis.. To analyze the data, Regression, Correlation tests were applied. Data from three different textile mills was collected and financial analysis of their annual reports was conducted to determine their growing profits.

Findings- The analysis and comparative results clearly suggested that that better HSE conditions lead to productivity profitably and just in time shipments

Practical Implications- The outcomes of the research might help the corporate decision makers, government policy formulators and other related quarters to understand the impact of social compliance audit on working conditions to understand the overall dynamics of HSE on productivity

Keywords: impact, productivity, social compliance audits, high profit
