ABSTRACT

This research project examines in detail the entrepreneurial ecosystem in perspective of its academic component. Pakistan today is faced with, along with a number of other social and political issues, consistently declining entrepreneurial activity which is so vital for any economy in the world today. Needless to say, such activities are a source of foreign exchange; contribute towards creation of jobs and circulation/flow of money which is very vital for any economy in general and Pakistan's fate in particular.

However, along with a lot of other components of the ecosystem, the academic perspective which is so vital to help prepare students and inculcate a sense of entrepreneurship in them is practically far from ideal. This research discusses exactly the same sensitive issue and makes recommendations on what needs to be done.

This project is written and completed by Emad ur Rehman and Muneeb Wasti on 20th of October 2012 under supervision of Mr. Aqeel Israr.

ACKNOWLEDGEMENTS

We would like to thank our teachers who have, throughout the tenure of our degree, groomed us and given us a vast sea of knowledge. Their efforts shall not go waste and we are sure that the knowledge imparted to us will go a long way in our careers and lives alike.

We would also like to thank our parents for their unconditional support during the course of our program.

TABLE OF CONTENTS

1. Abstract	2
2. Acknowledgements	3
3. Introduction	5-8
a. Problem Statement	9
b. Objectives of the study	9
c. Research methodology	10-11
4. Literature review	12-20
5. Industry analysis	21-25
6. Organizational analysis	26-30
7. Identification of issues	31-33
8. Possible options/ recommendations	34-49
9. Best option and recommendation	50-57
10. Questionnaire results	59-62
11. Appendix A	63-64
12. Bibliography	65-67
