ACKNOWLEDGEMENT

(With the Name of Allah, the Most Beneficent, the Most Merciful)

I would like to express my gratitude to almighty Allah who was my support at all times in every walk of my life. I am also thankful to my family for their prayers, interest and care they have taken in imparting me the education in such a fabulous environment. I would like to thank from the core of my heart to respected Sir ADIL RASHEED who entrusted me with this opportunity to work on this topic.

Again a very special thank to Sir ADIL RASHEED for his valuable comments and suggestions that enable me to shape up my thesis in a presentable format.

I would like to express my appreciation to the my coordinator, *Miss Sadia shirazi* for their support and help towards my postgraduate affairs.

Last but not least, my deepest gratitude goes to my beloved mother and also to my husband for their endless love, prayers and encouragement. To those who indirectly contributed in this research, your kindness means a lot to me. Thank you very much.

Aafia Bashir

MBA (Maritime)

ABSTRACT

Over the recent year maritime logistics and supply chain witnessed tremendous growth maritime transportation account for the majority of international trade and have a vital role in economic health of the nation.

Purpose

The purpose of the this research is to discuss the the development in maritime logistics and supply chain maritime. Shipping represent most ancient global transportation and after a concise foundation about the improvement of maritime in late decades, this thesis surveys the current attributes maritime operation organizes under three principle topics. To start with, it gives a review of the diverse administration sorts of delivery lines and flow in liner administration design and outline. Second, a worldwide depiction of the overall liner transportation system is proposed by method for vessel development information. The changing geographic conveyance of primary between port connections is investigated in the light of late reconfigurations of liner delivery systems (e.g. increase versus advocacy of port calls). We likewise talk about the position of seaports in liner transportation systems alluding to ideas of centrality, progression, and determination components. The part finishes up by expounding on the communications and interdependencies between seaport advancement and liner delivery system improvement strikingly under flow investment changes. Globalization of organizations, infrastructural bottlenecks, expanding doubt of supply chain systems, shortening of item life cycles and burgeoning of item mixed bag have constrained Pakistani firms to look past their four dividers. They face issues identified with picking and working with the right supply chain accomplices (suppliers, clients and logistics administration suppliers), cultivating trust between them and planning the right arrangement of gauging execution.

Methodology/Findings

In this thesis, we introduce a depiction picture of logistics and Supply Chain Management (SCM) drills. It is a result of the felt require by directors, master experts and academicians to address logistics and supply chain polishes at the national level. Our exploratory study is dependent upon both field visits and auxiliary information. We catch truths, figures and additionally qualitative reactions about the logistics framework and supply chain hones. We keep tabs on supply chain cooperation and organizations, supply chain structure, offices

system configuration, transportation and logistics and the part of Information and Communications Technologies (ICT) (Wilmsmeier and Notteboom, 2010). Field visits to no less than one significant office of 25 organizations were completed throughout 2005. We dissect and evaluate existing logistics and SCM practices and recognize rising patterns and in addition ranges of concern.

Practical Implications

The paper gives experiences into how far the organizations and their supply chains in Pakistan have come in managing significant logistics and supply chain issues, the practices they concentrate on or need to keep tabs on. We likewise highlight and location a couple of issues identified with supply chain directors and arrangement creators.

CHAPTER 1	1
INTRODUCTION	1
1.1. Introduction to Supply Chain Management	1
Globalization and Supply Chain Management	3
1.2. History of Global Shipping Industry	5
1.3. Background to Containerization	8
Containerization Concept	9
Modeling Supply Chain	10
1.4. Globalization Of Industry	11
Development of Maritime Logistics	12
1.5. Containerization & Its Key Benefits	13
Transportation Cost	14
Cost of Inventory	15
Level of Service	15
Container Terminal Purpose	16
1.6. Objectives of the Research	17
Purpose of the Study	18
1.7. Scope Of The Study	18
CHAPTER 2 METHODOLOGY	20
1.8. Research Methodology Deployed	20

1.9.	Significance of the Research	20
1.10.	Limitation of the Research	21
CHAPTER 3 LITERATURE REVIEW		22
3.1.	Global Supply Chain and Port/Terminal: Integration and Competitiveness 22	
3.2.	Impact of Supply Chain and Logistics On Role Of Ports	25
3.3.	Port Competition and Hinterland Connections	28
3.4.	The Role of Port Infrastructure and Logistics in Global Networks	29
3.5.	Transport Integration Tools For Supply Chain Management	32
3.6.	The Terminalization of Supply Chains: Reassessing the Role of Terminals in Port/Hinterland Logistical Relationships	33
3.7.	Maritime Logistics In The Global Supply Chain	35
3.8.	The Role Of Logistics Providers In Handling Supply Chain Dynamics	39
3.9.	The Preparation Of Strategic Plan On Maritime Transport Services	41
3.10.	The Role of Port Performance in Gateway Logistics	43
3.11.	Shipping Routes, Network Patterns, And Port Centrality	48
3.12.	The Centrality Of Container Ports	50
