# Abstract

---

Students are completing their degrees every year and their record are maintained in files which are not accessible to one. But now to facilitate students and their parents Graduate Directory which was stored in files is transferred online to everybody. Here students can make their online account on website through which they are authorized to view graduate directory of ex-students. The details contain graduated person image, name, current job, CGPA & his/her program. Another advantage of Bahria University Graduate Directory and FYP portal is to facilitate students regarding their final year projects and provide ideas for selecting their FYP. Another advantage of making an online Graduate Directory is to give an impressive image to the world about Bahria University.
