ABSTRACT

This research article is the feasibility study regarding the propose of new Education system based on online Education Transfer and one plate form for getting education all over the world. This new system will decrease the communication gap between the parents and the teacher and among the Institute administration to teachers and parents.

This research report first analyze the drawbacks of existing Education systems, then the previous literature study, what people describe many new form of Education system. After this survey study, I have proposed a new system based upon the acceptance of this system in this current scenario. The benefits of new system to teachers, students, parents and administration staff and the impact of new system on society and the effect on all over the world.
