INTRODUCTION

ABSTRACT

The main purpose of this study was to " assess the role of work motivation on employee performance". This study in an assessment of this purpose used deductive approach in which a qualitative survey was carried out in PSO in order to find out how motivation is being implemented and what factor influence employees towards improving their performance

However a study from previous researches used in this study showed that different results could be obtained from different groups of already working employees. This study therefore can be seen as an introduction to a more detailed study to be carried by future researchers on the field of employee's motivation.
