Abstract

These days, automobiles are owned by ordinary people who are mostly dependent on those cars as a means of transportation, and vehicle breaking down in the middle of the road or having any other mechanical issue, when you do not have the required equipment with you, can be a bit problematic, especially when there are not enough auto-repair shops/services within your reach. Living in Islamabad, several people face this difficulty and wish there was an easy way to fix it, without having to walk miles for hours to find a mechanic and ensuring that the mechanic provides safe and reliable services. This is the reason specialized and talented automobile technicians are in demand. These days, automobile companies provide specialized technicians for the vehicles made by their company.

Table of Contents

1 INTRODUCTION.....9

1.1 Project Background/ Overview 9

1.2 Project Objectives.....9

1.3 Project Scope.....9

1.4 Methodology.....10

1.5 Feasibility Study.....11

1.5.1 Risks Involved 11

1.5.2 Resources Requirements 11

1.6 Application Areas.....11

1.7 Tools and Technology.....11

1.8 Deliverables.....11

1.8.1 Location tracking 11

1.8.2 Communication 11

1.8.3 Feedback 11

1.8.4 User profile..... 12

1.9 Constraints..... 12

1.9.1 Budgets..... 12

1.9.2 Time..... 12

1.10 Project Exclusion 12

2 LITERATURE REVIEW.....13

2.1 Critical Analysis.....14

3 REQUIREMENT SPECIFICATIONS 18

3.1 Application Overview 19

3.2 Intended audience 19
3.3 Basic Functionality 19
3.4 User Characteristics 20
3.5 Functional Requirements 20
3.6 Non-Functional Requirements 21
3.7 Hardware Selection 21
3.8 Performance Requirements 21
3.9 User Interface 22
3.9.1 GUI 22
3.9.2 Tools 22
3.10 Budget 22
4 SYSTEM DESIGN 29
4.1 System Architecture 29
4.2.1 System Sequence Diagram 30
4.2.2 Deployment Diagram 31
4.2.3 Activity Diagram 32
5 SYSTEM IMPLEMENTATION
5.1 System Architecture 35
5.2 Tools and Technology Used 37
5.2.1 Android Studio 37
5.2.2 Android Software Development kit 37
5.2.3 Android Mobile Framework 37
5.3 Development/Environment languages used 37
5.4 Android Mobile Device 38
5.5 Application Access Security 38
6 SYSTEM TESTING AND EVALUATION
6.1 Introduction 38
6.2 Graphical Interface Testing 38
6.3 Usability Testing 38
6.4 Software Performance Testing 38
6.5 Compatible Testing 39
6.6 Exception Handling 39

6.7 Load Testing.....39
6.8 Security Testing.....39
6.9 Installation Testing.....39
6.10 Test Cases.....42

7 CONCLUSION AND PERSPECTIVES
7.1 Conclusion.....45
7.2 Future Directions.....45

APPENDIX-A
Sample Images.....47
