MR. SUROOR ZAIDI

A Report submitted to the Department of Computer Science Bahria University, Islamabad

In partial fulfillment of the requirement for the degree of BS (CS)

Certificate

We accept the work contained in the report titled “Android Based Intelligent Travel Guide System”, written by Mr. Saqib Risalat AND Mr. Hasin Ali as a confirmation to the required standard for the partial fulfillment of the degree of Bachelor of Science in Computer Science.

Mr. Faisal Bashir

DEDICATION

We would like to dedicate this project to every person who supported us but above all to our beloved family who have been a constant support. Their unconditional love motivates us to set higher targets and inspire us to tackle every task with enthusiasm.

ACKNOWLEDGEMENTS

We first thanks to ALLAH ALLMIGHTY (SWT) to give us strength, knowledge and ability to accomplish our Project. We learned a lot during this project and this will help us in our future life. We are also thankful for this project to our supervisor (Mr. Suroor Zaidi) who helped us very much in every aspects during time of difficulties, without him this project it would not be completed, and to whom we are greatly indebted. At last, we would like to thank all of our family and friends for their support and encouragement.

Abstract

With the advent of time and technology, almost everyone has cell phone; it became an essential need for all of us. There is hype of using different mobile application that provide different features. Likewise, we introduced Android Based Intelligent Travel Guide System (ITGS) that guide the user towards the destination. It provides a variety of features by taking selection from the user, to travel through van. System will provide him information according the locations he selects. Transportation mainly are by Van and Taxi. System will Provide Map, distance, expected time, and Transport fairs. Source and destination highlighted to get the better understanding. It is very lightweight application this system is just to guide a person towards destination.

Contents

Dedication	iii
Acknowledgements	iv
1 Chapter 1	2
1.1 Introduction.....	2
1.2 Problem description.....	2
1.3 Objective of system	3
1.4 Project scope.....	3
2 Literature review.....	6
2.1 Tools and technology	6
2.1.1 Android studio.....	6
2.1.2 Java.....	6
2.1.3 SQLite	7
2.1.4 Google map.....	7
2.1.5 API.....	7
3 Requirements.....	9
3.1 Nonfunctional requirements	9
3.2 Functional Requirements	10
3.3 System Requirements	11
3.4 Enthusiasm	11
3.5 Use Cases.....	12
3.5.1 Overall application Use case	12
3.5.2 Bus Information Use case	14
3.5.3 Locating Bus Stops.....	16
3.5.4 Add Bus Stops.....	18
3.5.5 Notification use case.....	20
4 System Design.....	23
4.1 Data Flow Diagrams	23
4.1.1 System Flow Diagram.....	23
4.1.2 Google Map Flow diagram.....	24
4.1.3 Application Flow diagram.....	25
4.2 Sequence diagram	26
4.2.1 Selection of Location.....	26

4.2.2	Markers for Source and Destination	27
4.2.3	Alternative Route of Transportation.....	28
4.3	System Architecture.....	29
4.4	Major Components of System.....	29
4.5	Functionality of Components.....	29
4.6	Tools and Technology Used.....	30
4.6.1	Android Studio	30
4.6.2	Blue Stack	30
4.6.3	SQLite Database.....	30
4.7	Screenshot of Intelligent Travel Guide System	31
4.7.1	Application Startup.....	31
4.7.2	Splash Screen.....	32
4.7.3	Selection of Source	33
4.7.4	Selection of Destination	34
4.7.5	Information System Provide	35
4.7.6	Show Map Activity.....	36
4.7.7	Admin Panel	37
5	Testing and Evaluation.....	39
5.1	Software Testing.....	39
5.1.1	Graphical User Interface Testing	39
5.1.2	Usability Testing.....	45
6	Conclusion	47
	User Manual	48
	Selection of Source and destination	49
	Information System Provide	50
	Show Map Activity.....	51
	Admin Panel	52
