ACKNOWLEDGEMENT

First of all, I am grateful to **Almighty Allah** for awarding me the courage to confront every challenge in life with greater success and complete the whole thesis.

I would also like to express my sincere gratitude to my respected teacher & supervisor **Mr. Qazi Ahmed** for the overall support and help required in thesis. He made my research work a real learning experience. I am extremely thankful to him for his expert guidance and all the necessary facilities to complete my thesis. Last but not the least; I would also like to acknowledge with much appreciation the crucial role of my **parents** and **sister** for their unceasing encouragement and support.

Finally, I feel lucky enough to get constant encouragement, support and guidance from Department of Management Sciences of Bahria University who helped me to successfully complete my research work.

Abstract

In the present business environment managers try their level best to make organization efficient and increase effectiveness of employees. To stream line procurement or logistics is one of the significant ways to become competitive. E-procurement is the purchase of goods/services, and works electronically and integral part of overall strategic sourcing plan in the current business environment. Over the years the world has witnessed a dramatic change in business management and service function. E-procurement has benefited both the managers by managing and operating their business at lower costs and with great efficiency and has given the stakeholder multiple options for deciding appropriately regarding feedstock, engineering items, utilities and service.

Strategic sourcing and e-securing can enhance the operational, money related and store network arrange. Since grasping e-obtaining in the affiliation determinedly impacts strategic sourcing, these two follows in inventory network create better execution for associations. As it were, if companies execute both sourcing and e-obtaining, administrators practice joint and collaboration influence to progress firm's execution. This examination gives observational affirmations of favorable circumstances in e-obtainment and strategic sourcing with objective that it can give elevating perspective toward key sourcing in supervisors' basic leadership.

This research has added new insights on analyzing the impact of e-procurement and strategic sourcing on management performance in an organizational structure. Only procurement department of hospitals in Islamabad were the subject of the present study. This may limit the generalized ability of the research result. Strategic sourcing and e-securing can enhance the operational, money related and store network arrange. Since grasping e-obtaining in the affiliation determinedly impacts strategic sourcing, these two follows in inventory network create better execution for associations. As it were, if companies execute both sourcing and e-obtaining, administrators practice joint and collaboration influence to progress firm's execution. This examination gives observational affirmations of favorable circumstances in e-obtainment and strategic sourcing with objective that it can give elevating perspective toward key sourcing in supervisors' basic leadership.

Table of content

Title page

Chapter 01

01-Introduction-----	03
1.1- Background-----	06
1.2- Objective of our research-----	08
1.3- Problem statement-----	08
1.4- Research question-----	09
1.5- Scope of research-----	09
1.6- Significance of research-----	10

Chapter 02

02-Literature Review-----	11
2.1- E-procurement-----	12
2.2- E-procurement practices-----	21
2.3- E-procurement performance framework-----	21
2.3.1-Procurement maturity-----	21
2.3.2-Procurement Alignment-----	22
2.4- Strategic sourcing-----	23
2.5- Measuring management performance-----	27
2.6- Supply chain management-----	32
2.7- Theoretical framework-----	35
2.8- Variables-----	36
2.8.1 Independent variables-----	36
2.8.2 Dependent variable-----	37
2.8.3 Hypothesis-----	38

Chapter 03

3- Research Methodology-----	39
3.1- Data collection-----	39

3.1.1 Primary data-----	39
3.1.2 Secondary data-----	39
3.2- Research design-----	40
3.3- Sampling-----	40
3.3.1 Sampling techniques-----	40
3.3.2 Sampling size-----	40
3.4- Research tool-----	41
3.6- Data analysis technique-----	41

Chapter 04

4- Critical Analysis of Data-----	42
4.1- Reliability statics-----	42
4.2- Test applied-----	43
4.3- Correlation analysis-----	43
4.4- Regression analysis-----	44
4.1- Analysis of e-procurement-----	44
4.2- Analysis of strategic sourcing-----	47
4.5- T-Test analysis-----	50

Chapter 05

5- Conclusion, Recommendations & limitations-----	53
5.1- Conclusion-----	53
5.2- Recommendations-----	54
5.3- Limitations-----	55
5.4- Bibliography-----	56
5.5- Appendix-----	59
