Examiner-II: Saqib Mushtaq

Dr. Sarwar Zahid

Research Coordinator

Dr. Muhammad Ali Saeed

Head of Department - Management Sciences

ABSTRACT

Improvement is always considered as the centre of attention in the organisations and it is examined that with the passage of time every organisations, enterprise, business institute etc. are planning to improve their business, functional and operational processes. In this research work the discussion within the context of improving supply chain management using quality management is discussed. In this research work the proactive research methodology is considered and It is perceived that this research methodology consists of eight phases. All the key phases in the context of research are linked with each other. It is perceived that all the key objective that are set in the context of this research work have being achieved. During the analysis of this research we considered three companies that are working in Pakistan. Based on the data analysis results It is perceived that their integration of information technology based solution better results and outcome can be achieved. In the end the key recommendation is provided so that the companies that are working in Pakistan or in any region of world would be able to extract better results.

TABLE OF CONTENTS

Abstract.....	iii
Chapter 1: Introduction.....	1
1.1 Supply Chain Management.....	1
1.2 Quality Management.....	3
1.3 Research Question.....	4
1.4 Research Objective.....	5
1.5 Problem Statement.....	5
1.6 Thesis Contribution.....	6
1.7 Thesis Organisation.....	7
Chapter 2: Literature Review.....	9
2.1 Technology and its Relationship.....	10
2.2 Cloud Computing.....	12
2.3 Logistic Networking and Route Techniques.....	14
2.4 Framework.....	16
2.5 Hypothesis.....	17
2.5.1 Hypothesis 1.....	17
2.5.2 Hypothesis 2.....	17
2.5.3 Hypothesis 3.....	17
2.5.4 Hypothesis 4.....	17
2.5.5 Hypothesis 5.....	17
2.6 Comparison and Critical Summary.....	18
Chapter 3: Research Methodology.....	20
3.1 Research Design.....	21

3.2	Phase Description	22
3.2.1	Define Research Problem	22
3.2.2	Review Concept and Theories	23
3.2.3	Review Previous Research Finding	23
3.2.4	Develop Theoretical Framework Model	23
3.2.5	Formulate Hypotheses	23
3.2.6	Design Research.....	24
3.2.7	Collect Data	24
3.2.8	Analyse Data.....	24
3.2.9	Interpret and Report	24
3.3	Population and Sample Size.....	24
3.4	Data Collection.....	25
3.5	Question Development and Scale	25
3.6	Statistical Development Tools	26
3.7	Reliability Statistics.....	27
Chapter 4:	Data Analysis and Presentation	29
4.1	Demography Analysis	29
4.2	Gender	30
4.3	Marital Status	31
4.4	Age	32
4.5	Experience.....	33
4.6	Correlation Analysis.....	34
4.7	Regression Analysis	37
4.8	Performance Indictors	40

4.9 Results and Discussion.....	41
Chapter 5: Conclusion	44
5.1 Recommendation.....	48
5.1.1 Impact of Each Recommendation	50
5.2 Future Area.....	52
References.....	52
Appendix.....	57
Questionnaire	57
Part 1: Personal Information	57
Part 2: Instructions	58
Segment A: Cloud computing.....	58
Segment B: Route Optimization and technique.....	58
Segment C: Traditional Computing	59
Segment D: Logistic network	59
Segment E: Cloud computing technologies (Challenges and Opportunities).....	60
Segment F: Supply Chain Management	60
