CONVERSION OF REFLECTION TIME TO DEPTH	45
SEISMIC DEPTH SECTION	46

## ACKNOWLEDGEMENTS

First and foremost, I would like to thank God for helping me throughout the year especially in the time period when I struggled. My sincere thanks to my head of department Dr. Mubarak Ali and supervisor Asst. Prof. Shaista Iftikhar. Their excellent supervision and regular discussion sessions has helped me in finishing this project in the required time. I was lucky to have such friendly and technically strong supervisors.

My deepest thanks to all the staff at E&ES for all of the knowledge they shared to me. I would like to thank all the teachers who provided with a new insight in petroleum geosciences. In particular Dr. Shamim A. Siddiqui, Zahid Ilyas, Jahangir Khan and Muhammad Tahir whose attention provided significant knowledge and influenced me to get involve with seismic and geology.

I would like to thank my parents, brothers; whose moral support soothed me throughout the year. I hope this thesis brings something positive to the industry and helps others doing research relating geophysics.
