

COMPREHEENSIVE STUDY ON MARINE GEOPHYSICAL SURVEYS IN PASNI,MAKRAN

By

MUHAMMAD FAHEEM KHAN

BS GEOPHYSICS

2010-2016

**DEPARTMENT OF EARTH & ENVIRONMENTAL SCIENCES
BAHRIA UNIVERSITY
KARACHI**

Acknowledgement

First of all, I would like to express my deep gratitude to Almighty ALLAH Who help me a lot at every stage of my life and gave me strength and potential to complete my thesis in a timely manner. Without the kind blessing of whom, I could not be able to complete my work and to be at such place.

All respect to Holy Prophet Hazrat Muhammad (P.B.U.H) who appeared and blossomed as model for whole of humanity.

I have to thank my family for their encouragement, motivation, support, endless love and prayers throughout my life. Thank you for giving me strength and appreciating me at every step of my life.

I wish to sincerely thank all respected my faculty members who were more than generous with their expertise and precious time. HOD Dr. Mubarak, Sir Tahir, Sir Jahanir, Miss Shaista And Sir Irfan.

It is a pleasure for me to introduce my supervisor Sir Muhammad Jahangir Khan for his inspiring guidance, dynamic supervision, constructive criticism countless hours of reflecting, reading, encouraging, and most of all patience throughout the entire process.

And, to all my friends, thank you from the core of my heart. Your friendship makes my life a wonderful experience.

Abstract

Marine seismic is a well established method to search for sub surface hydrocarbon deposits mostly with other applications as well. However, the method is often limited by various sources of noise. This is to study the mechanisms of marine seismic. The combined knowledge obtained by the research work conducted are then put to use in order to come up with geology on the basis of various geophysical surveys in offshore.

Tectonics & Geology of the Makran Region.....	7
Chapter 2:	
Marine Seismic Surveying.....	15
Chapter 3:	
3D-Seismic.....	42
Chapter 4:	
High Resolution Marine Survey.....	53
Chapter 5:	
Finding/Geology based on Marine Geophysical surveys in Makran.....	62
Conclusion.....	73
References.....	74
