A thesis submitted to the Department of Software Engineering, Faculty of Engineering Sciences, Bahria University, Islamabad in the partial fulfillment for the requirements of a Masters degree in Software Engineering

April 2018

Abstract

The purpose for undertaking this study was to identifying the challenges and issues in IOT adoption in Healthcares Sector. Considering the need to changing technological evolutions it is eminent to adopt for the changing and improving technologies in order to provide best possible healthcare to the patients. To understand the issues Unified Theory of Acceptance and Use of Technology (UTAUT) was used to identify these challenges and issues. This research was conducted using quantitative research methodology in which published UTAUT questionnaire was used. A sample of 250 was collected from 5 government sector hospitals. Data was collected from nurses, IT staff, psysichains, doctors and other hospital staff to study the various dynamics of IT in the healthcare sector. In this research effects of performance expectancy, effort expectancy, social influence and facilitating conditions were computed on behavior intentions of the users for acceptance of new technology in Pakistan. Analysis was conducted using SPSS software and tests of reliability, Pearson correlation and ordinary least square regression and moderation tests were performed to find the impacts. Our results suggest that the quality and performance of technology helps medical institutions achieve their usefulness. Hence it is important that hospital employ technology of the sort which provides good quality through service and information technology which can perform data processing as well.

Key Words: Issues, Challenges, Healthcare, IOT adoption, Performance expectancy (PE), Effort expectancy (EE), Social influence (SI), Facilitating conditions (FC) , Provisional areas (PA), Internet of things (IOT), Hospitals, Technology.

Table of Contents

Abstract	1
Dedication	2
Acknowledgments	3
Table of Contents	4
List of Figures	6
List of Tables	7
Introduction:	8
1.1 Background of the Study	8
1.2 Motivation for the Study:	9
1.3 Problem Statement and Research Objective.....	10
1.4 Scope:	10
Chapter 2	11
Literature Review	11
2.1 Healthcare Technology:.....	12
2.2 Challenges of IoT in Healthcare:.....	13
2.3 Theoretical Framework	14
2.4 Research Hypothesis	16
Chapter 3	19
Research Methodology	19
3.1 Research Design	19
3.2 Respondents Characteristics:.....	19
3.3 Data Collection.....	20
3.3.1 Measure Used	20
3.4 Data Analysis.....	20
Chapter 4	22
Results	22
4.1 Descriptive statistics	22
4.2 Psychometric Tests	23
4.3 Normality.....	25
4.4 Correlation.....	28

4.5	Regression	31
4.6	Smart PLS.....	36
Conclusion		40
1. Bibliography.....		43
Appendices.....		47
Appendix A.....		135
Questionnaire		147
