Bachelor of Science & Information Technology

Session: 2014 – 2018

Department of Computer Science,
Bahria University, Islamabad.

Certificate

We accept the work contained in this titled “Android Based Hospital Parking Reservation System.” using the concepts of mobile application development as a confirmation to the requirement to the fulfillment of the degree BS (IT)

Name of Supervisor

Internal Examiner: Name of the Internal Examiner (Title)

Project Coordinator: Name of the Project Coordinator (Title)

Head of the Department: Name of the HOD (Title)

Dedication

We would like to dedicate this project to our parents and teachers who have been a constant support and give opportunities. They have given us inspiration to handle every task with dedication and enthusiasm. Their love, belief and affection in us have made to push our limits and aim to aspire a lot more in life.

Acknowledgements

We thank ALLAH (SWT) for His countless blessings upon us. We also want to thank our teachers, and especially to our supervisor **Sir Talha Naqash** for his efforts, help and support. Our project could never be completed without their help and support. We would also like to thank all friends who motivated us to complete this project. We would like to thank our parents for their love, affection, prayers and advises.

Abstract

The Developed project is a Hospital Parking Reservation System. It allows customers a simple way to reserve a parking space for them. The purpose of this system is to automate, a manual reservation system of Hospital. We introduce a new model of reservation. It helps to manage all parking slots of Hospital Parking Reservation System efficiently. User can reserve a space for them based on the availability of the slot. “Parking Reservation System for Hospital Parking Reservation System” provide users to reserve a free slot via Mobile Application in advance for given time and date with minimum charges.
