Abstract

Pakistan is a developing country facing many problems. As we know for all problems there is always a solution for it. Community service is one of it. As there are many Non-Government Organizations (NGOs) involved in community support, they may face many issues such as gathering volunteers, donations etc. Also, people have little or no idea about which NGO to donate or become their volunteers to perform community work. Community Support Network is a web portal which will provide a platform for both the NGOs and people who are willing to participate in the community work.

Community Support Network portal will be able to raise funds to run the community service activities. Not only that, these organizations can easily gather volunteers. Main issue is people are reluctant to donate money to organizations about which they know little or nothing. Due to this platform, users can properly get to know about the organizations, their activities, the region they are performing in. This will help in making it easier for everyone to freely and actively participate in the community work.
