# Abstract

Pak-Marketplace is a website serving to the little and medium size endeavors across Pakistan. The greater part of the general population who should visit our Website are merchants or purchasers searching for business by pitching their administrations or items to the purchasers the whole way across Pakistan. Our principle vision is to give chance to those individuals who have physical stores and don't have a web-based business stage. By utilizing our stage, they can transfer their item and make their computerized inventory. We will give them following offices; including items with designs, refreshing value, arranging items in various classes, we will give them retail facade page on which they will transfer the photo of their general shop, their contact data and store area. They will communicate with the clients. The clients who will utilize our stage should have a great deal of assortment to browse.
