My deep gratitude goes firstly to Almighty ALLAH who has given me the audacity and power to carry out the whole research process on time. After this I am thankful to my supervisor Sir Kaleem Ahmed Ghias as he has helped me and guided me so well throughout the time period while conducting my research. I am very much contented to say that Sir Kaleem has shared his vast knowledge and experiences regarding the topic that I chose and the whole research process as well. He has supported and motivated me during the development of this research paper.

Secondly, I would not be forgetting those all the other teachers who have trusted me and help me out in any way they can in the completion of my thesis report.

My appreciation also extends to the staff of library in helping me out to find the prior researches.

Abstract

The macroeconomic factors are essential for any revolution in economy. Any unexpected variation among these factors can have effects on the economic system in different ways possible. If there is an occurrence of any changes in the policies and make alteration in the approaches that would put the economy on road of improvement. Main determination behind this research is to find the influence of GDP, exchange rate, interest rate and inflation rate on stock market in Islamic Republic of Pakistan. There is a very insignificant impact of these independent variable on dependent variable.
