

A REFERENCE ARCHITECTURE FOR PERSONALIZATION OF USER INTERFACES IN MOBILE APPS

M Yasir Siddique

Enrollment: 01-241162-011

Supervisor: Dr. Awais Majeed

A thesis submitted to the Department of Software Engineering, Faculty of
Engineering Sciences, Bahria University, Islamabad in the partial fulfilment for the
requirements of a Master's degree in Software Engineering

September 2018

Approval Sheet

THESIS COMPLETION CERTIFICATE

Scholar's Name: M Yasir Siddique Registration No: 47408

Programme of Study: MS Software Engineering

Thesis Title: A Reference Architecture for Personalization of User Interfaces in Mobile Apps

It is to certify that the above student's thesis has been completed to my satisfaction and, to my belief, its standard is appropriate for submission for Evaluation. I have also conducted plagiarism test of this thesis using HEC prescribed software and found similarity index at ____ that is within the permissible limit set by the HEC for the MS/MPhil degree thesis. I have also found the thesis in a format recognized by the BU for the MS/MPhil thesis.

Certificate of Originality

CERTIFICATE OF ORIGINALITY

This is certified that the intellectual contents of the thesis

A Reference Architecture for Personalization of User Interfaces in
Mobile Apps

are the product of my own research work except, as cited property and accurately in the acknowledgements and references, the material taken from such sources as research journals, books, internet, etc. solely to support, elaborate, compare and extend the earlier work. Further, this work has not been submitted by me previously for any degree, nor it shall be submitted by me in the future for obtaining any degree from this University, or any other university or institution. The incorrectness of this information, if proved at any stage, shall authorities the University to cancel my degree.

Signature: _____ Date: _____

Name of the Research Student: M Yasir Siddique

Acknowledgement

I am thankful to Allah Subhanahu Wa Ta'ala for giving me the strength to complete my research work.

M Yasir Siddique
MS (Software Engineering)

Abstract

The smartphone users are increasing on large scale day by day and companies are developing mobile apps with the aim to enhance user experience. Personalisation is an important factor for enhancing user experience. There are two aspects of personalisation: content personalisation and user interface personalisation. A considerable amount of work has been done related to content personalisation in mobile apps, but personalisation of user interface still needs attention due to its significant importance. User experience can be enhanced significantly if user interface elements are personalised based on the user's interaction behaviour. To address this challenge, a reference architecture is proposed which consists of a model and a system architecture to personalise user interfaces in mobile apps. A Mobile User Interface Personalisation model is presented that incorporates various factors like Frequently Accessed Items, Frequent Sequence of Interactions/Navigation and Frequently Searched Items which can enhance user experience of mobile users. Our work also proposes architectural components that can deal with the personalisation of UI. We have extended the concept of designing explicitly navigational nodes in Web applications, to menu items in Mobile apps, so that based on the user's usage behaviour in terms of frequently used items, pattern of usage and frequently searched items, the location/position of these menus and buttons is personalised. A sample Mobile app has been build based on our proposed model and architecture to validate our model. User evaluation carried out by a sample set of users also validates relevance and significance of our model.

Table of Contents

Approval Sheet.....	i
Certificate of Originality.....	ii
Acknowledgement	iii
Abstract.....	iv
Table of Contents.....	v
List of Figures.....	viii
List of Tables	ix
List of Abbreviations	x
Chapter 1: Introduction	1
1.1 Problem Statement.....	2
1.2 Research Questions.....	2
1.3 Research Methodology	2
1.4 Structure of Thesis.....	2
Chapter 2: Literature Review	3
Chapter 3: Mobile UI Personalisation Model	12
3.1. Model for Personalisation of User Interfaces in Mobile Apps	12
3.1.1. Frequently Accessed Items.....	12
3.1.2. Frequent Sequence of Interactions/Navigation.....	13
3.1.3. Frequently Searched Items	14
3.2. Algorithms for Personalisation Factors	14
3.2.1. Frequently Accessed Items.....	14
3.2.2. Frequently Searched Items	15
3.2.3. Frequent Sequence of Interactions/Navigation.....	16
3.3. Personalisation at Both Individual and Global Level	17
3.4. Conceptual Model.....	18

3.4.1. Frequently Accessed Items	18
3.4.2. Frequently Searched Items	19
3.4.3. Frequent Sequence of Interactions/Navigation.....	19
3.5. Flow of Events in Conceptual Model	19
3.6. Conclusion	21
Chapter 4: Model Validation with the help of Proof of Concept	22
4.1. Progressive Web App (PWA).....	22
4.2. Shopping List App	22
4.2.1. Default Work-Flow of App	23
4.2.2. Personalised Work-Flow of App	24
4.3. Implementation Details.....	25
4.3.1. Individual Level Personalisation	25
4.3.2. Global Level Personalisation.....	28
4.4 Conclusion	29
Chapter 5: User Evaluation of Personalisation Model.....	30
5.1. Questionnaire Protocol.....	30
5.1.1. Questionnaire Conduction Plan	30
5.1.2. Target Audience	31
5.1.3. Target Devices	31
5.2. Results Discussion and Analysis	31
5.2.1. Frequently Accessed Items	32
5.2.2. Frequently Searched and Used	33
5.2.3. Global Personalisation.....	34
5.2.4. Needs, Easiness, Saving Time	35
5.2.5. Mobile Orientation and Device Capability.....	36
5.2.6. Controlling of App Personalisation Factor	37
5.2.7. Suggestion of App to other People	38

5.2.8. Feedback from Users	38
5.3. Importance of “Sequence of Interactions/Navigation”	39
5.4. Conclusion	43
Chapter 6: Conclusion	44
6.1. Contributions.....	44
6.2. Future Work	45
References	46
Appendix A	50
Questionnaire	50
Questionnaire Results	53
App Implementation	55
