Department of Computer Engineering

Bahria University, Karachi Campus

Acknowledgments

In the name of ALLAH, the Most Gracious, the Most Merciful, at each beginning, we express our appreciation to Almighty ALLAH for showering his blessings and endowments upon us to finish this project.

Despite the fact that our names shows up on the front of this report. In any case, it would not have been conceivable without the kind backing and help of numerous people. We owe a considerable number because of a large number of individuals who helped and bolstered us amid the making of the project.

We are thankful to **Engr. Ali Ahmed,** supervisor of our project, for his steady motivation, bolsters, comprehension and significant help. They have taken the agony to experience the project and make vital adjustment as and when required. Express our appreciation to **Cdre. Muzammil Hussain SI(M), SE, Director of Bahria University (Karachi Campus)** for his profitable proposals and advices all through the course. I likewise extend my gratitude to different faculty members for their participation amid my course.

We might want to extend our gratitude to our group members **Shahrukh Ali Khan, Hatum Hussain** for their endeavors and at long last we might want to thank our companions for their collaboration to complete this project.

More importantly, we might want to express gratitude toward Almighty Allah who made all things conceivable.

Abstract

The point of this venture is to structure and build up a gadget that consistently screens the indispensable markers, as it occasionally measures pulse and body temperature. It likewise triggers a crisis message in the event that the sign has been estimated above or beneath foreordained qualities. What's more, it sends this data by means of Bluetooth innovation to be shown in the Android application interfaces to be spared in the database documents and recovered upon solicitation. The Android application send the area of patient through GPS. The venture plans to build up a typical stage to give methods for correspondence between the specialist and patient, where the doctor can see the patient every day records.

Index Terms
GPS, Pulse Sensor, Body Temperature, Android Studio

Table of Contents

1. INTRODUCTION 5

1.1 REASON FOR THIS PROJECT 5
1.2 PROBLEM STATEMENT 5
1.3 OBJECTIVES OF THE PROJECT 5
1.4 SCOPE OF THE PROJECT 6
1.5 PURPOSE OF THE DOCUMENT 6
1.6 OVERVIEW OF THIS DOCUMENT 6

2. BACKGROUND AND LITERATURE REVIEW 8

2.1 EXISTING SYSTEMS 8
2.1.1 Existing Systems Description 8
2.1.2 Problems in the Existing Systems 8
2.2 RELATED WORK 8
2.3 LITERATURE REVIEW 10
2.3.1 Heart 11
2.3.2 Heart Rate 12
2.3.3 Influence of Temperature on Heart Purpose 13
2.3.4 Measurements of Pulse Rate 13
2.4 MYOCARDIAL INFARCTION 15
2.5 INDICATIONS OF HEART OCCURRENCES 16

3. SYSTEM ANALYSIS 18

3.1 WORK ANALYSIS 18
3.1.1 Work Flow Diagram 18
3.1.2 Work Breakdown Structure 19
3.2 DATA ANALYSIS 20
3.2.1 Data Flow Diagram 20
3.2.2 System Requirements 21
3.2.3 Proposed Solution 23

4. SYSTEM DESIGN 24

4.1 DATA ACQUISITION 24
4.2 MICROCONTROLLER (MCU) 28
4.3 MESSAGE BETWEEN MICROCONTROLLER AND ANDROID INTERFACE 29
4.4 ARDUINO IDE 29
4.4.1 Measuring BPM 30
4.4.2 Calculating Body Temperature 30
4.4.3 Android Studio 30
4.5 DESIGN CONSTRAINTS 31
4.5.1 Hardware and Software Environment 31
4.5.2 End- User Characteristics 32
4.6 ARCHITECTURE DIAGRAM 32
4.6.1 Hardware Architecture 32
4.6.2 Software Architecture 33

4.7 USE-CASES 34
4.8 DATABASE DESIGN 34
4.9 GANTT CHART 34
4.10 DEVELOPMENT METHOD 35
5. IMPLEMENTATION 37
5.1 BODY TEMPERATURE 37
5.1.1 Algorithm for Body Temperature 37
5.1.2 Features of LM35 Temperature Sensor 37
5.2.1 Algorithm for Pulse Rate 38
5.2.2 Features of Pulse Rate 38
5.3 ARDUINO NANO 38
5.4 TRANSFERRING ARDUINO NANO PROCESSES DATA TO ANDROID DEVICE 39
5.5 ANDROID APPLICATION 39
5.6 USER-INTERFACE 39
5.6.1 Patient View 40
5.6.2 Doctor registration Interface 41
5.6.3 Doctor View 41
5.7 OVERALL ALGORITHM USED 42
6. TESTING 43
6.1 COMPONENTS OF A TEST PLAN 43
6.1.1 Test Plan ID 43
6.1.2 References 43
6.1.3 Test Items 43
6.2 PULSE SENSOR TESTING 43
6.3 LM35 INSTRUMENT TESTING 44
6.4 ARDUINO TESTING 44
6.5 RISK ASSESSMENT 45
7. RESULTS AND DISCUSSION 46
7.1 RESULTS 46
7.1.1 Pulse Sensor in Serial 46
7.1.2 Lm 35 Sensor in Serial 46
7.1.3 Bluetooth Response in Android Application 46
7.1.4 GPS Response in Android Application 47
7.2 DISCUSSION 48
8. CONCLUSIONS AND FUTURE WORK 49
8.1 CHALLENGES 49
8.2 ACCOMPLISHMENTS 50
8.3 FUTURE WORK 50
