EXECUTIVE SUMMARY

This research report has a topic "Problems Faced By Women In Public Transportation In Pakistan."

This research report is about a very important social issue , that is to be seen in almost every house. Almost 50% of the population are women they have to come out and use the public transport for different purposes most of the time.

They have to face different kinds of problems.

- Bad behavior of the public.
- Bad atmosphere of vehicles.
- Less seats.
- Not suitable fares.
- Discouragement of the male members etc

These all factors are there always all the time making the bad impact of our society.

We chooses the objectives that were the factors that are , causing the trouble for females. These all factors contribute to discouragement of the females. Only those women can travel which have the confidences and courage to fight.

By our research we just want to the check the presence of factors , that was some time neglected.

By our research we do not want to claim that every time the behavior of male is bad but mostly that is there. This does not mean that all the females are mannered and males have always bad attitude.

The recommendations given were the need of proper education of both genders, women should be aware of their rights, separate transportation for women to avoid bad incidences, increase the number of seats.
