# Abstract

Ambition of this project is to overcome the tedious back and forth navigation of different apps while creating a single meme. This system provides all the base functionality which is require to create a meme under one roof. By using this system user will avoid the tedious and sometimes frustrating back and forth navigation of multiple apps. This system provides a simple yet elegant way to create a meme using single app.

# Acknowledgments

First, all the adore and gratitude to Allah Almighty who has given us chance to work on such a project and helped us all the way to its accomplishment and also given us the curiosity and passion of work that lead us to completion of this project. We are also very much obliged and pleased to our honorable supervisor Mr. Ali Irfan for his support, vision and favors all the way on working this project. His motivations to work hard and not to given up really inspired us and we are honored to have him at our side. There is no alternate to the prayers and affections of Parents and family. Even in tough circumstance their prayers are always with us. I would also like to thank Christoph Wöss, Patrick Favre-Bulle and Paul Spiesberger for introducing me with the world of software engineering. Becoming a software engineer without their help and guidance, was nearly impossible to me.
